DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-10 rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. (6,342,933) in view of Moon (6,229,695) further in view of Kajiwara (5,791,913) further in view of Iwamoto et al. (5,710,607)

Regarding Claims 1, 3, 4, 5, 6, 7 and 11, Nakamura et al. disclose a liquid crystal display including driving circuit held between convex portion and elastic pressing portion formed on two box members. Liquid crystal display includes a metal box member, a mold member with a back light source, and the driving circuit substrate for driving the liquid crystal panel held by these two cage bodies, where the driving circuit substrate is held between a convex portion formed in one of the two cage bodies and an elastic pressing portion formed in the other box member, the driving circuit substrate is grounded to the metal box member through this holding portion and the driving circuit substrate is held without being secured. Nakamura et al. fail to disclose the required holding structure, depression structure and the deformable/elastic structure. However, Moon discloses a palm-sized computer with a frame to hold device plates where the required holding structure is disclosed. Furthermore, Kajiwara discloses a display panel inspection socket where the required depression structure is disclosed. Finally, Iwamoto et al. disclose an impact resistant liquid crystal apparatus where the required deformable/elastic structure is disclosed.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required holding structure, depression structure and the deformable/elastic structure as taught by Moon, Kajiwara and Iwamoto et al. respectively in order to have a liquid crystal display device with ease of manufacture.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
